ITEM 170

APPLICATION OF CLASSES AND/OR RATES-INADVERTENCE CLAUSES

1. When rates in tariffs published by DAYR or NMFC ratings are subject to a released valuation being stated on the bill of lading and the shipper fails or declines to indicate an acceptable valuation on the bill of lading at the time of shipment, the shipment will be considered as being released to the lowest valuation provided and the shipment will be transported and charged for subject to such limitation of such liability. This part applies only when released valuation is required in order to determine a rate and does not apply when the shipper has the option to release or not to release a shipment as to value.
2. When rates in tariffs published by DAYR or NMFC ratings are subject to, or are determined by, the density of the articles shipped and the shipper fails to indicate the density on the bill of lading at the time of shipment, the shipment will be charged for on the basis of the class or rate applicable on the lowest density provided. Upon receipt of satisfactory proof of a higher actual density, the freight charges will be adjusted to those applicable to such actual density.

ITEM 370

BLIND SHIPMENTS

(Note A)

Upon written instructions received by the carrier prior to receipt of shipment at point of origin, accompanied by a thorough Bill of Lading covering the shipment, the carrier will accept the shipment when tendered by the party in possession of the shipment, subject to the following conditions:

1. Prior to notification to carrier for pickup of blind shipment, customer must contact carriers rate department to obtain a Quote Number. This quote will include total freight charges based on information given by customer, including the applicable charge of **\$56.16** for the blind shipment.
2. After receipt of the Quote Number, the customer will then give all blind shipment information to the carrier's dispatcher, who in turn will complete the Blind Shipment Form. Both the Blind Shipment Form and the original Bill of Lading received at the pickup point will be submitted to the billing clerk with the same pro number. The Quote Number must be written on the Blind Shipment Form.
3. Blind shipments must move prepaid, unless the party paying for the blind shipment charge is also paying the freight charges collect.
4. Carrier will have no responsibility or liability for incorrect billing or delivery of the blind shipment if customer fails to obtain a Quote Number prior to the freight being received by the carrier.

ITEM 381

CANCELLATION OF ITEMS

As this tariff is supplemented, numbered items with letter suffixes cancel, except as otherwise specifically indicated, correspondingly numbered items in the original tariff or in a prior supplement. Letter suffixes will be used in alphabetical sequence starting with A.

Example: Item 445-A cancels Item 445, and Item 365-B cancels Item 365-A, in a prior supplement, which in turn cancelled Item 365. (If Item 365 had not been cancelled, for some reason, Item 365-B would cancel it as well). If the new item provides a specific cancellation of a prior issue or issues, this rule is not applicable.

 - (a) That quantity of freight which, because of unusual shape or dimensions or because of necessity for segregation from other freight, requires the entire capacity of a pup(s); or
 - (b) That quantity of freight which, in the manner loaded, utilizes a linear length of 20 feet or more in the pup(s) and either of the following conditions apply:
 1. Linear width of the freight is equal to or is greater than 5 feet in the pup(s), or
 2. Linear width of the freight is less than 5 feet and no article identical in size and shipping form to the largest article in the shipment can be loaded in the pup(s); or
 - (c) That quantity of freight that exceeds 20,000 pounds, or by weight or size limitations can be legally loaded in a pup(s); or
 - (d) That quantity of freight consisting of one article loaded in a pup(s) when one additional article, weighing the same as or more than the article loaded, cannot be legally loaded; or
 - (e) That quantity of freight picked up on equipment other than pup/set that would be defined as a CAPACITY LOAD as defined herein, if such freight was loaded in a pup/set.
3. The provisions of this item may not be used to reduce rates, minimum weights or total charges below the otherwise applicable charges on the shipment.
4. When during one calendar day, two or more shipments are received from one consignor, at one origin address, destined to one or more consignees at the same destination delivery address, that combine will aggregate the "full capacity" at one or more pups, the shipments will be combined and considered as one shipment and will be subject to the provisions of this item.

e) When carrier's employee assists in loading, unloading, or checking the freight, this item will apply whether or not the power unit is actually detained.

f) Nothing in this item shall require a carrier to pickup or deliver freight at hours other than carrier's normal business hours. This shall not be construed to restrict a carrier's ability to accept pickup and delivery schedules at hours other than its normal business hours.

b) Prearranged scheduling:

1) Upon reasonable request of consignor, consignee or others designated by them, carrier will, without additional charge, enter into a prearranged schedule for arrival of the vehicle for loading or unloading.

or

(II) to request that the vehicle with power be returned to carrier without being subject to charges for storage or redelivery so long as free time has not yet expired. When the vehicle is returned for completion of loading or unloading, the computation of any remaining free time will resume. If free time has expired and

detention has begun to accrue, storage or redelivery charges as may otherwise be provided will be assessed.

3) When carrier's employee interrupts loading or unloading by the taking of any normal non-working periods, any such time will be excluded from the computation of time in excess of free time.

c) When more than one truckload shipment or a truckload shipment and one or more less-than truckload (LTL) or any quantity (AQ) shipments are loaded) on one vehicle at the premises of consignor or when more than one truckload shipment or a truckload shipment and one or more LTL or AQ shipments are unloaded from one vehicle at the premises of consignee or other designated party, the combined weight will be used to determine free time, in all other instances the individual shipment weight will be used.

d) When a vehicle with power is changed to a vehicle without power at the request of consignor, consignee or other party designated by them, the free time and detention charges will be applied as follows:

1) If the change is requested and made before the expiration of free time for a vehicle with power, free time will cease immediately at the time the request is made, and detention charges for vehicles without power will immediately commence with no further free time allowed.

The carrier shall not be responsible for any delays resulting from the failure of any party to make the proper arrangements for the performances of these services.
2. Except as otherwise provided in NOTE D, when the consignor or consignee, its agent or representative has failed to make arrangements with the terminal operator for the performance of loading or unloading services and the payment therefore, the carrier will endeavor to complete the arrangements necessary to effectuate the loading or unloading of the carrier's vehicle and will advance the following charges in payment of such services, which shall be in addition to all other lawful rates and charges:

4. LTL or AQ shipments consigned to one consignee at one port may, upon arrival or prior to arrival at carrier's terminal serving the port, be divided into separate shipments for delivery to piers, docks, pier terminals, transit sheds or wharves. Such shipment shall be assessed charges based on a combination of rates or charges applicable to and from the port city involved. The revised billing shall be sent to and be paid by the party requesting this service. This service will not be given if delivery has been made according to original billing.

The following notation must be placed on the bill of lading by the consignor:

"Arrangement made with pier operators to bill shipper or consignee directly for pier loading or unloading charges."

If additional labor is required for this operation, the full loading or unloading rate will be applicable. (This provision shall not be construed as compelling the terminal to provide pallets).
- (b) Pre-palletized or skidded cargo which is pre-palletized or skidded to the satisfaction of the terminal operator and which is situated on the pier or on the truck so that it can be loaded into a truck or unloaded from a truck by the insertion of the terminal's forklift truck blades under the pallet or skid without any necessity of shifting the cargo prior to such insertion. If the cargo is not so situated, the full loading or unloading rates are applicable.

NOTE C--Not applicable on shipments destined to or picked up at Firestone Natural Rubber and Latex Company and United Trading Company at Locust Point MD.

All charges so advanced will be collected from shipper or consignee with other lawful charges.

NOTE A--Subject to a minimum charge per shipment of **\$65.53**.

NOTE B--Loading and unloading of Pre-palletized cargo: Pre-palletized cargo is a consolidation of units of general cargo secured to pallet to the satisfaction of the terminal operator. A pallet is a two level platform constructed of wood, metal or other material of sufficient strength to accommodate the cargo for which it is used, with at least 4 inch bearers between the two levels, and open on at least two sides. The cargo must be loaded in such a manner as to cover the loading surface of the pallet, leveled at the top and squared on all four sides so that the unit forms a smooth block. The pallet must be an integral part of the cargo and must remain with the cargo when it is moved either as an export or an import shipment. Any palletization performed on the pier does not qualify for the pre-palletized rate. In order to qualify for the pre-palletized rate, the minimum weight or measurement of the pallet and cargo shall be either 1,000 lbs. or 64 cubic feet, and the maximum weight shall be 10,000 lbs. Bales or bundles, skidded machinery, iron, steel and other unfinished metals and glassware are not included in this definition. NOTE D--The handling of heavy lifts in excess of 10,000 lbs. for any single package shall be subject to completion of the necessary arrangements with terminal operator and shall be limited to the capacity of the terminal operator's equipment at the location. The tariff rates set forth herein for other than heavy lifts are applicable to single packages weighing 10,000 lbs. or less.

NOTE E--Partial Loading or Unloading (Tailgate):

Partial loading or unloading commonly called "tailgate" loading or unloading shall be defined as that loading or unloading which enables the pier operator, through the use of a forklift truck and operator only to place or remove, cargo onto or from the tailgate of a truck. Tailgate loading shall also be defined as such when, through the use of the pier operator's platform or by removal of stakes or standards of flatbed equipment, the forklift operator is able to place the cargo either at a point of rest on the truck or in a position for further handling by personnel of the motor carrier.

All other loading and/or unloading that requires more equipment and/or personnel than one forklift truck and operator per package or pallet shall be considered full loading or unloading.

The choice of partial or full loading and/or unloading shall be left to the discretion of the motor carrier, shipper or consignee, provided the service requested comes within the provisions of this definition. (These provisions shall not be construed as compelling the terminal operator to provide pallets.)

NOTE F—

(a) Truck Loading: Truck Loading shall mean the service of moving cargo from a place of rest on the pier which is readily accessible to the truck, elevating the cargo onto the truck and stowing of the cargo in the truck, but shall not include special stowage, sorting or grading of, or otherwise selecting the cargo for the convenience of the trucker or the consignee. The service shall include loading on consignee's pallets.

The loading and stowing of cargo in the truck shall be under the supervision of the driver of the truck.

ITEM 566

INSIDE PICKUP OR DELIVERY

Applicable when the carrier is requested to perform a delivery (or pickup) at an area not located at the established receiving or shipping area, and not reasonably adjacent to the truck. The carrier shall assess a charge of **\$12.35/CWT** subject to a minimum charge of **\$122.61** per shipment and a maximum charge of **\$1225.89** per shipment. All charges will be assessed to the payor of the freight charges. This Item is further defined and clarified by the Notes listed below:

1. Standard delivery is defined as delivery to a receiving area for the consignee reasonably and practically adjacent to the truck. Delivery shall ensure the goods are placed to an area out of the elements preventing damage from weather or theft. Any request to deliver the shipment to another storage area beyond the standard or established receiving area (or beyond the area immediate to inside the front door when a store front type delivery) shall result in the application of this Inside Delivery charge.
2. Deliveries to Retail Malls shall constitute an Inside Delivery if the carrier is required to park at a common receiving dock and wheel the shipment by hand through the hallways of the Mall to the respective store. If a given store has a dedicated receiving dock, or the carrier can reasonably and practically park in front of the store (ie store front delivery), then the provisions of Note #1 above will guide.
3. If the delivery is to another floor (other than the ground floor level) the provisions of this Inside Delivery Item 566 will apply providing , provided that the carrier has access to an elevator that can accommodate the carriers standard freight handling tools (hand truck etc) and there is no charge to the carrier for use of the elevator. In the event that the delivery to another floor is not supported by an elevator or does not accommodate the carriers standard freight handling tools, the carrier may apply Extra Labor charges as found in Item 560 in lieu of the of the Inside Delivery charges found in this Item 566. Deliveries of this nature will be specifically reviewed and approved by the payor of the freight charges before the service is performed.
4. The carrier will have no liabilities or responsibilities for damages or injury to persons or property resulting from Inside Delivery services performed by the carrier. The Consignor or Consignee requesting the carrier perform the Inside Delivery service shall indemnify, protect, save and hold harmless the carrier from any claims, liabilities , losses , damages, cost and expenses , of any kind imposed upon, incurred by or asserted against the carrier, arising from, connected with or resulting from the Inside Delivery services performed.

2. Inadequate loading or unloading facilities;

ITEM 576**LITIGATION OF DELIQUENT BILLS**

Failure to make payment of freight charges for services performed as a common carrier which subsequently results in legal action taken against the debtor, will be subject to the following:

1. Forfeiture of all discounts, allowances, commodity rates, brokerage agreements, incentives or any other rate reductions enjoyed by such debtor, if any, on all unpaid freight bills.
2. In addition to above, debtor will be responsible for attorney fees and/or court costs associated with or as a result of suit.

PAYMENT OF CHARGES

1. Allowances, discounts, exception classes and commodity rates shall apply only when tariff charges are paid within a maximum period of forty-two (42) calendar days from invoice date.
2. The provisions of this rule do not change in any way the carrier's obligation to collect nor the freight charge payor's obligation to pay tariff charges within the standard credit period maintained by the carrier in compliance with 49 CFR 1320. This rule simply establishes a condition precedent for the application of the special tariff provisions described in Paragraph 1.

ITEM 578

LOADING BY CONSIGNOR-UNLOADING BY CONSIGNEE

1. In lieu of pickup or delivery service as provided in Item 750 and when convenient for customer and carrier, customer may load/unload carrier's trailers, under the following conditions:
 - A. **SHIPPER LOAD** – When prearranged with carrier's local operations, carrier will spot or drop trailer at the shipper's loading facility so the shipper may load the trailers at its convenience. Any discrepancy on those shipments tendered under the Shipper Load and Count arrangement will be handled in the following manner:
 1. At pick-up, carrier will include "SL&C" on the bill of lading, indicating that the shipper counted and loaded the shipment without carrier's driver present. The shipper will properly block and brace the freight. Carrier's failure to note "SL&C" on the bill of lading will not affect the liabilities of the parties, if the shipper has in fact performed the counting and loading without a representative from carrier present.
 2. Carrier will provide seals for security purposes to the shipper when requested. Failure to seal a load will not affect the terms and conditions outlined in Item 578.
 3. Carrier will notify the shipper's representative by auto-fax of any exceptions within 24 hours of first unloading. This will not include weekends or holidays. Carrier cannot be liable for uncountable palletized orders, picked up and delivered with wrap intact.
 4. Shortage claims filed will be thoroughly investigated. Carrier will work with the shipper to use overage, as mutually agreeable, to offset their liability on valid claims.
 5. Shortages will be reported as above. The shipper will advise carrier disposition of any merchandise that could or should be applied to a valid shortage. In the event of a shipper caused shortage, the shipper will allow carrier to adjust the Bill of Lading accordingly to reflect actual piece count and weight.
 6. Carrier will accept liability for any loss or damage to product that has not been properly reported unless the loss or damage is one of the concealed nature. In this respect, any claim following will be settled based on the findings of the investigation.
 7. Carrier can be responsible for handling units only as applicable and to the extent that a piece count can be verified. Individual item numbers and P.O. shortages at delivery shall not be deemed as shortages against Carrier when the handling unit count matches the amount properly reported as received on the SL&C trailer.
 8. Carrier will not decline liability of claims just because the bill of lading is noted "SL&C". The burden is carrier's to either provide a clear proof of delivery, a properly reported exception or payment of the claim. The shipper agrees not to file claims when discrepancies have been properly reported.
 - B. **CONSIGNEE UNLOAD** – Carrier will drop or spot trailers at the consignee's facility so the receiver may unload the trailers. Any discrepancy on those shipments tendered, as CONSIGNEE UNLOAD will be handled in the following manner unless a separate agreement is already established and signed in place:
 1. Carrier agrees to spot or drop trailers at Consignee's place of business for the purpose of Consignee to complete the unloading process within normal free time or otherwise agreed to in writing.
 2. Consignee will not utilize carrier's equipment for any use other than the express purpose of unloading.
 3. When the Consignee fails to report to carrier's local service center that equipment is empty and available to carrier for removal, it will be subject to detention rules and charges.
 4. Consignee will accept liability for any and all damages occurring to carrier's equipment, or for the loss of carrier's equipment, while in its physical possession, other than normal wear and tear or an Act of God. Consignee will promptly reimburse carrier for the cost of repairing or replacing such equipment.
 5. Carrier will note CONSIGNEE UNLOAD on the delivery receipt, indicating that the consignee unloaded and counted the shipments without carrier's driver present. Carrier's failure to note CONSIGNEE UNLOAD on the delivery receipts will not affect the liabilities of the parties, if the consignee has in fact performed the counting and unloading without a representative from carrier present.

6. Carrier will provide sealed trailers with the carrier's seal number documented for security purposes. Failure to seal a load will not affect the terms and conditions outlined in this item.
7. Delivery receipts will be signed by the consignee at the time the trailer is dropped for unloading, or if not operationally feasible, will be available to carrier no more than 24 hours after delivery.
 - a. The consignee agrees to notify carrier by fax on a mutually approved form of any exceptions within 24 hours of the trailer being dropped. This will not include weekends or holidays. Carrier shall not be liable for exceptions reported after 24 hours of trailer being dropped.
 - b. Notice of any exception is to be faxed on the mutually approved form to the attention of the local service center's OS&D associate.
8. Carrier shall not be liable for uncountable palletized orders, picked up and delivered with shrink wrap intact or for Shipper Load and Count orders that have been properly reported to the shipper at first unloading.
9. Carrier shall only be responsible for handling units as signed for and tendered by shipper. Individual item numbers and purchase order shortages shall not be deemed shortages against Carrier when the handling unit count matches the amount signed for at time of Pickup, or as applicable, properly reported as received on a Shipper Load and Count trailer.
10. Shipments tendered to the Consignee to be unloaded at their convenience are to be secured by the Consignee in a manner to prevent theft. Carrier will not be held responsible for stolen product while in the possession of the Consignee.
11. Carrier agrees not to decline liability of claims just because the delivery receipt is noted CONSIGNEE UNLOAD. The burden is carrier's to provide a clear proof of delivery when the documents are returned to the carrier. It is the consignee's responsibility to provide a properly reported discrepancy with dated fax confirmation for payment of the claim. The consignee agrees not to file claims when discrepancies have not been properly reported.
12. The Consignee will accept liability for any loss or damage to product that has not been properly reported unless the loss or damage is one of the concealed nature reported within 15 days of the trailer being spotted for unloading. In this respect, any claim following will be settled based on the findings of the investigation.

ITEM 596**MAXIMUM WEIGHTS-TL OR VOL**

ITEM 610

MINIMUM CHARGE--HOUSEHOLD GOODS OR PERSONAL EFFECTS

1. The minimum charge for a shipment will apply as follows:

- A. The applicable rate for each article multiplied by the actual weight of the articles but not less than the minimum charge shown in Class Rates and Charges, from origin to destination. Charges will not be reduced below the applicable minimum charge after discount or absolute minimum charge, whichever produces the higher charge.
- B. The minimum charge for an LTL shipment of Household Goods or Personal Effects as described in NMFC items 100200 and 100262 will be 500 pounds at the applicable rate.
- C. For the minimum charge for CAPACITY LOAD see [Item 390](#) herein.
- D. For the minimum charge for CONTROL AND EXCLUSIVE USE see [Item 470](#) herein.

[BACK TO CONTENTS](#)

ITEM 610-1

MINIMUM CHARGE--CUBIC CAPACITY AND DENSITY

1. When all or part of a shipment tendered to the carrier is classified as being a CUBIC CAPACITY AND DENSITY shipment, the minimum charge for the quantity of freight loaded per trailer/doubles will be as follows:
 - (a) Carrier will multiply the total cubic feet of the shipment by 6 pounds to determine a 'calculated' weight, then multiply the calculated weight by Class 150 rates from the DAYR Can-Am 505 class rate tariff applicable at time of shipment to determine the gross charges and apply the customer's otherwise applicable discount percentage to determine the final charge. If a customer does not have a discount on file, a **25%** discount will be used to determine the final charge on shipments to R&L Carriers, Inc. Customer or account specific FAK class exceptions less than class 150, will not apply. No other discount, reduction or allowance will apply.
 - (b) Overflow freight will be charged as a separate shipment and so rated.
2. The term CLASSIFIED AS A CUBIC CAPACITY AND DENSITY SHIPMENT refers to any shipment which is greater than 750 cubic feet and has an average density of less than four pounds per cubic foot.
3. Average density is based on the total cubic feet of each packaged/handling unit of the shipment. If due to the nature of the packaged/handling units or per instructions from the shipper/consignee, carrier is unable to load freight on top of the packaged/handling units or cannot double stack like kinds of packaged/handling units, a minimum height measurement of 84 inches will be used when determining the cubic footage of the packaged/handling units. Unitized shipments exceeding 14 line feet, or shipments of non-unitized freight that are loaded in such a manner that determining the total cube of each packaged/handling unit is impractical, or shipments tendered in such a manner that they cannot be transferred, will have the cube calculated on the linear dimensions of the entire shipment.
4. When, during one calendar day, two or more shipments are received from one consignor, at one origin address, destined to one or more consignees at the same destination delivery address, that combined will be greater than 750 cubic feet and has an average density of less than four pounds per cubic foot, the shipment will be combined as one shipment on one bill of lading, and will be subject to this item.
5. This Item will not apply on shipments subject to EXCLUSIVE USE or CAPACITY LOAD rules, or to TL or Volume rates and charges.
6. The Cubic Capacity & Density rule will not apply when the actual class of freight less the applicable discount is greater than the result of this rule.

ITEM 640

**MIXED PACKAGES--LTL OR AQ
(Exception to Section 3 of NMFC Item 640)**

ITEM 645

MIXED SHIPMENTS--VOLUME OR TRUCKLOAD

(See NOTE A)

(Exception to NMFC Item 645)

SECTION 1: Unless otherwise provided, a number of articles, for which the same or different Vol or TL rates, classes, ratings or minimum weights are provided, constituting a mixed Vol or mixed TL shipment, will be charged at the actual or authorized estimated weight and at the straight Vol or TL class rate (NMFC or Exceptions), commodity rate or column commodity rate (not "Specific Mixture", "All Freight", "Freight, All Kinds" or "All Commodity" rates or ratings) applicable to each article except as provided in NMFC Item 310 and Item 640 herein, and at the highest straight Vol or TL minimum weight that would be applicable to any articles in the shipment if that quantity of each article in the mixed shipment is tendered as a straight Vol or straight TL shipment. Any deficit in the minimum weight will be charged for at the lowest Vol or TL rate applicable to any article in the mixed Vol or TL shipment.

SECTION 2: Subject to the provisions of Sec. 1, when the aggregate charge on the entire shipment is made lower by considering the articles as if they were divided into two or more separate Vol or TL shipments, the shipment will be charged for accordingly.

SECTION 3: Subject to the provisions of Sec. 1, when the aggregate charge on the entire shipment is less on the basis of the Vol or TL rate and Vol or TL minimum weight (or actual or authorized estimated weight if in excess of the Vol or TL minimum weight) for one or more of the articles, and on the basis of the LTL rate (See NOTE C) or rates on the actual or authorized estimated weight for the other article or articles, the shipment will be charged for accordingly. On articles included in Vol or TL shipments on which LTL rates are applied, Vol or TL package requirements will apply, and if so packed or prepared for shipment, will not be subject to increased charges provided in Section 3(a) of NMFC Item 687 (See NOTE D).

SECTION 4: Shipments subject to Vol or TL rates or ratings, applying on "Specific Mixtures", "All Freight", "Freight All Kinds", "All Commodity" or similarly designated rates or ratings will be charged for on the basis of the Vol or TL rate and its accompanying minimum weight or actual weight when greater. If an article or articles not provided for in the mixture is included in a shipment, such article or articles will be charged for as a separate LTL or Vol or TL shipment, whichever produces the lowest charge (See NOTE C). The weight of such articles not included in the mixture may not be used to make up the truckload minimum weight. On articles included in Vol or TL shipments on which LTL rates are applied, Vol or TL package requirements will apply, and if so packed or prepared for shipment, will not be subject to increase charges provided in Sec. 3(a) of NMFC Item 687.

SECTION 5: If a lower charge results under the application of Sections 1, 2 or 3, than under the provisions for a specific Vol or TL mixture, such lower charge will apply.

SECTION 6: Where different Vol or TL rates and minimum weight are provided on the same article included in a mixed Vol or mixed TL shipment, the lowest charges that can be computed by the use of any such rate and its accompanying minimum weight for that article shall be used in the determination of the charges for the entire shipment.

SECTION 7: On mixed Vol or TL shipments of commodities subject to "Excess" rates or ratings (See NOTE B) each commodity shall be considered separately and "Excess" rates or ratings (See NOTE B), will apply only when the basis minimum weight is met on each commodity. (Two or more commodities subject to the same rates or ratings and minimum weights are to be treated as one commodity in applying the excess class rate or rating).

NOTE A--The provisions of this rule will also apply on shipments accorded stop-off in transit privileges in accordance with the provisions of the tariff making reference hereto, or provisions authorized herein.

NOTE B--Excess rates or ratings are those rates or ratings specifically published to apply on the amount of the shipment loaded in the same vehicle which exceeds the stated VMW.

NOTE C--The LTL rate to apply will be rate applicable on the weight of the article or articles being charged for on the basis of the LTL rate or rates considering such portion as a separate shipment for rating purposes subject to a minimum charge if applicable.

NOTE D--The weight of the portion of the shipment assessed LTL rates shall not be used in computing the applicable Vol or TL minimum weight.

**RELEASED VALUE--CARRIER LIABILITY COVERAGE
CARRIER LIABILITY**

1. In lieu of the valuation indicated in the NMFC, valuation, rates and charges on used or reconditioned articles will apply when the consignor declares no value or declares an actual or released value of 50 cents or less per pound on the original bill of lading:

A. Apply 100 percent of the otherwise applicable class rates and/or minimum charge less applicable discounts, if any, as published in tariffs subject to this item.

B. Carrier's maximum liability shall not exceed 50 cents per pound on used or reconditioned articles.

When consignor declares an actual or released value exceeding 50 cents per pound for used or reconditioned articles on the original bill of lading carrier liability shall be specifically limited to 50 cents per pound and provisions of Item 2 below shall be considered as not applicable.

2. If the declared, actual or released value exceeds \$25.00 U.S. per pound, the carrier's maximum liability shall be limited to \$25.00 U.S. per pound per package or \$100,000 U.S. per incident, whichever is lower, for shipments from U.S. to Canada. For shipments from Canada to U.S. shall have a maximum liability of \$2.00 CDN per pound computed on the weight of the shipment subject to a maximum liability of \$50,000 per incident, unless otherwise specifically provided for in the Day&Ross account tariff publication. Any notation on the bill of lading indicating declared, actual or released value in excess of these identified limits of liability will not increase the carrier's liability at any time. On shipments to or from the US and Canada Day&Ross does not offer, does not charge for and will not be responsible for excess liability coverage notations on the bill of lading.

3. Carrier's maximum liability shall be actual cost of goods supported by certified copy of original invoice not to exceed \$25.00 U.S. per pound per package or \$100,000 U.S. per incident, whichever is lower, for shipments from U.S. to Canada and \$2.00 CDN per pound \$100,000 per incident for shipments from Canada to U.S. Items described in the NMFC and shipped under released value provisions will be subject to the maximum released value depending on class listed at the time of shipment. When a Freight All Kinds (FAK) class or an exception class rating is provided in any tariff governed by the provisions of this tariff for a commodity that has available declared or released value provisions in the NMFC to obtain a lower class, the commodities are released to the lowest declared or released value provided in the NMFC regardless of the shipment weight or whether rated truckload, LTL, minimum charge, or absolute minimum charge. Carrier shall not be liable for any loss or damage to a shipment or for any delay caused by an act of God, the public enemy, the authority of law, the inherent vice of the goods, or the act or default of Shipper. The burden to prove freedom from negligence is on the Carrier or the party in possession.

A. When the NMFC offers the consignor the option to declare an actual, declared or released value on the Bill of Lading, and such valuation is NOT declared by the consignor and the shipment is inadvertently accepted by carrier, the provisions referencing the lowest actual, declared or released valuation will apply and carrier's liability shall not exceed that valuation.

B. Corrected bills of lading or letters of authority to add or change the valuation will not be accepted.

C. On shipments originating in the U.S. and destined to the Republic of Mexico, the U.S. carrier will be liable for the —full, actual value of the commodities (subject to the provisions in Paragraph 2), until such time as the shipment is delivered to the U.S. broker.

D. On shipments originating in the Republic of Mexico and destined to the U.S., the U.S. carrier will be liable for the —full, actual value of the commodities (subject to the provisions of Paragraph 2), from the time of receipt of the shipment from the U.S. broker until delivered to the U.S. consignee.

E. There will be no carrier provided cargo liability coverage for shipments moving between the Mexico origin/destination(s), and the U.S. broker.

F. Movement of property as part of a continuous movement which has been or will be transported by an air carrier or a foreign air carrier is subject to a maximum liability of \$.50 per pound per piece.

4. Carrier's liability for loss or damage to any article(s) or part thereof for which the charges are determined by FAK (Freight of All Kinds) class or Exception class is limited to the (1) actual cost of the goods lost, damaged or destroyed; (2) limited liability provisions of the Bill of lading, or carrier limits of liability as listed in item 2 above; (3) applicable limited liability provisions of the NMFC; or (4) lowest Released Value shown in the NMFC for the commodity shipped, or \$100,000 per incident per Shipper if from the US (\$100,000 per incident if to the US from Canada), whichever is less, subject to the maximums by exception class as shown below:

CLASS	MAXIMUM LIABILITY PER POUND PER PACKAGE	CLASS	MAXIMUM LIABILITY PER POUND PER PACKAGE
50	\$ 1.14	110	\$ 17.56
55	2.28	125	18.21
60	2.91	150	18.54
65	5.64	175	19.75
70	6.33	200	20.84
77.5	8.36	250	23.03
85	11.80	300	23.03
92.5	14.12	400	23.03
100	17.28	500	23.03

5. The carrier cannot be reasonably aware of the consequences of and the costs accruing to the consignor, consignee, owner or any other party in the event of the loss of the use of the goods due to late, delayed or non-delivery of the goods, the whole, or partial destruction or all or any part of the goods however caused. 1. If the description, weight, or other information contained on the bill of lading is incomplete or believed to be incorrect, the Carrier or Carrier's agent will take action necessary to determine the correct information. Actions to determine actual freight characteristics include:
 - A. Inspection of packages
 - B. Verification of gross shipment weights
 - C. Verification of actual or declared density
 - D. Collection of other sufficient evidence necessary to verify whether or not the shipment is correctly described.

When the information is found to be incorrect, the bill of lading and carrier freight bill will be corrected and freight charges assessed according to the proper descriptions and weights, except when mixed commodities are palletized by the Shipper, the increased weight will be charged at the highest rated commodity in the shipment. Deficit weight, if any, will be charged per NMF 100 series.
3. Density will be determined by the cube utilized as determined by the methods contained in Item 110, Section 8 of the National Motor Freight Classification (NMF 100) Series and the weight shown on the shipper's bill of lading, unless the carrier determined the weight on the bill of lading to be in error or the shipper provides documentation that the weight was in error.
